

Assignment: Create a New AWS Account and Name it "Production Account"

Objective:

The purpose of this assignment is to familiarize students with the process of creating an AWS account, which is an essential first step in managing cloud resources.

Task Details

1. **Create an AWS Account**

- Visit the [AWS Management Console](#).
- Click on the "Create a Free Account" button to begin the process.
- Follow the step-by-step instructions to create your account.

2. **Account Details**

- During the account creation process, use your **personal email address** or a **dedicated email address** for the assignment.
- Name the account as **Production Account** in the Account Name field.

3. **Billing Information**

- Provide valid billing information as required. AWS offers a **Free Tier** for new accounts, but ensure you understand which services are free and which incur charges.

4. **Verify and Secure the Account**

- Verify your email address and phone number during the registration process.

5. **Access the AWS Management Console**

- Once the account is created and verified, log in to the AWS Management Console.

This account will be used for one of the optional labs later in this course.
